

Grapher

Present your data at its best. Grapher offers high-quality graphing tools so any engineer, researcher, or geologist can get the most out of their data.

You work hard gathering your data. Don't settle for subpar visualizations. Utilize Grapher's extensive offerings to quickly create **stunning 2D & 3D graphs while maintaining accuracy and precision.**

Present Your Data Accurately With 80+ Graph Options

Grapher offers high-quality graphing tools so you can get the most out of your data. Grapher provides over 80 different 2D and 3D graphing options to suit multiple industries, from geology and hydrology to environmental work and construction.

Line/Scatter Plots

- Line
- x Scatter
- x Line/Scatter
- x Step
- x Bubble
- x Class Scatter
- x 3D Ribbon
- x 3D Wall
- x 3D Step
- x XYZ Line/Scatter
- x XYZ Bubble
- x XYZ Class Scatter

Vertical/Horizontal Bar Charts

- x Bar
- x Floating Bar
- x Category Bar
- x 3D Bar
- x 3D Floating Bar
- x XYZ Bar
- x XYZ Floating Bar

Histograms

- Histogram
- 3D Histogram

Pie Charts

- Pie
- 3D Pie
- Doughnut
- 3D Doughnut

Box Plots

- Vertical Box
- Horizontal Box
- 3D Box
- Notched Box

Vector Plots

- 1 & 2 Point Vector
- XYZ 2-Point Vector
- XYZ-dx,dy,dz Vector

Q-Q Plots

- Q-Q
- Normal Q-Q

Ternary Plots

- Ternary Scatter
- Ternary Line/Scatter
- Ternary Line
- Ternary Class Scatter
- Ternary Bubble
- Piper
- Piper Class Scatter
- Durov

Function Plots

- $Y = F(X)$ Function
- $X = F(Y)$ Function
- Parametric Function
- 3D $Y = F(X)$ Function
- 3D $X = F(Y)$ Function
- 3D Parametric Function

Geochemistry Plots

- Piper
- Piper Class Scatter
- Durov
- Durov Class
- Stiff

Polar Plots

- Polar Line
- Polar Scatter
- Polar Line/Scatter
- Polar Class Scatter
- Point Polar Vector
- Polar Function
- Polar Bar
- Polar Rose
- Polar Wind
- Radar

Contour & Surface Maps

- Contour Data
- Contour Grid
- Contour Function
- Surface Data
- Surface Function
- Surface Grid

Customize Each Detail

Control every aspect of your plot down to the smallest detail. Grapher's extensive customization options allow you to convey complex ideas in an easy-to-understand manner.

- Add legends, titles, and axes
- Include inset zoom
- Edit all axis parameters
- Add multiples axes
- Scale axes as linear, logarithmic, natural logarithmic, or probability
- Combine multiple graphs
- Add fit curves, error bars, and statistical reports
- Easily filter data in and out of your plots
- Date/Time formatting
- Place graph components in a precise location
- Define custom line styles, colors, and fills
- Edit text, line, fill and symbol properties
- Add text, polylines, symbols, and polygons

Dive Into Analysis

Creating an impressive graph is only the start. Grapher can help you leverage your years of expertise with extensive analysis charts, tools, and statistical features. Identify trends, find new insights, and locate opportunities. Grapher developers listen to what scientists need to perform their jobs and has many pre-defined analysis tools, as well as the ability to add your custom tools.

Statistical calculations

- First input row
- Last input row
- Number of values
- Number of missing values
- Sum
- Minimum
- Maximum
- Range
- Mean
- Median
- Mode
- First quartile
- Third quartile
- Standard error of the mean
- 95% confidence interval for the mean
- 99% confidence interval for the mean
- Variance
- Average deviation
- Standard deviation
- Coefficient of variation
- Coefficient of skewness
- Coefficient of kurtosis
- Komogorov-Smirnov goodness of fit
- Critical Value of K-S statistic at 90, 95, 99 % significace level

Pre-Defined Fit Curves

- Linear
- Log
- Exponential
- Power
- Spline Smoothing
- Polynomial
- Orthogonal Polynomial
- Through Origin
- Running Average
- Weighted Average
- LOESS (LOWESS)
- RMA (Reduced Major Axis)
- Normal Distribution (Gaussian)
- Lognormal Distribution
- Exponential Distribution
- Power Distribution
- Inverse Gaussian Distribution

In addition to these pre-defined analysis tools you can perform custom functions, add custom fit curves, error bars, and confidence intervals.

Create Scripts to Automate Repetitive Tasks

Create scripts to automate repetitive tasks, and run your favorite scripts directly from Grapher's UI. Grapher can be called from programming languages such as C++, Python, or Perl. Grapher also ships with Scriptor, a built-in Visual Basic compatible scripting tool that can run with the script recorder to automatically transform actions performed in Grapher into a script, no prior knowledge required!

- Change the data file path for all graphs in all projects in one folder
- Specify date/time axes limits
- Add text objects
- Create a graph from a Grapher template
- Create graphs and change properties of the plot and axes
- Add relative axis scales
- Rename objects
- Save your favorite workflows as a script for later use with the script recorder

Share Data With Colleagues

Seamlessly visualize and analyze data from multiple sources for multiple industries. Grapher reads numerous file formats and supports all popular export formats. Quickly share your work with colleagues, stakeholders, and clients in their preferred viewing format.

- Universally accepted data import options such as XLSX, CSV, DBF, TXT, and DAT
- Export to industry standard PNG, TIFF, JPG, PDF, PNG, or SVG
- Tools to easily insert graphs into presentations
- Preview data and final outputs with Gallery and Preview features

100% Satisfaction Guaranteed or 100% of Your Money Back

Here at Golden Software, LLC, our mission is to help every scientist and engineer communicate complex ideas by transforming their data into easily understandable forms. Each of our products is designed around simplicity and control, backed by our legendary customer success team.

WE KNOW... our products can produce results for you. They can help you communicate your complex ideas. Our products can help you analyze your data and help you accurately tell the story of your project. These tools can help you land clients, impress peers, and WOW stakeholders. They can help you leave a lasting impression on the world.

BUT... we also know you don't know this yet. And you won't until you experience our products for yourself.

THAT IS WHY... we provide you this audacious guarantee. This is the distillation of a 35+ year adventure designing, developing, and honing powerful visualization and analysis features as requested by scientists and engineers like YOU.

The features and functionality we develop can produce results far beyond its license and maintenance fees. We are assuming all your risk, so you have zero.

Now, let us be clear about the condition of this guarantee.

This is an action guarantee. You have to install, activate, and make an effort to learn the product. Each program was designed to be straightforward and we have a legendary customer success team to support you every step of the way. What you don't use can't help you.

To qualify for your refund, send us an explanation of why the product did not prove to be a valuable software tool for your needs. It's as simple as this: Give the product a wholehearted attempt and your investment return is guaranteed.
